Participate and learn how to contribute to our exciting project.

KDE COMMUNITY WORLD SUMMIT
Ludwigsburg 2004

- KDE - the most popular graphical user interface on Linux (and a complete development platform and desktop environment) is created by a community of dedicated developers, translators, artists, documentation writers and other contributors.
- This worldwide KDE community gathers in August for a 9 day event of conferences, meetings, tutorials, coding marathons, bug squashing, architectural design discussions, desktop polishing and fun activities.
- KDE gives you a supreme desktop for free -- Please help KDE to organize its big event. We are seeking sponsors who help us finance venue, insurance, equipment, airfares for people from far away and hostel costs.
