openSUSE Education: the Team

Inside SUSE:

- Jan Weber aka Japa83
- Peter Varkoly aka varkoly
- Lars Vogdt aka kl_eisbaer

Inside the Community:

- Jigish Gohil aka cyberorg
- Andrea Florio aka Anubisg1
- James Tremblay aka SLEducator
- Jordi Bruguera aka Jordibruguera
- David Van Assche
- Andreas Ochs aka aochs
- Andi Sugandi
- ...and many more that are not forgotten - at least 25 are listed on http://en.opensuse.org/openSUSE:Education_team

Timeline ?

- http://www.timetoast.com/timelines/opensuse-education

Goals for openSUSE Education

Support schools using Linux

Contribute to and improve openSUSE

Build a cross distribution community for education

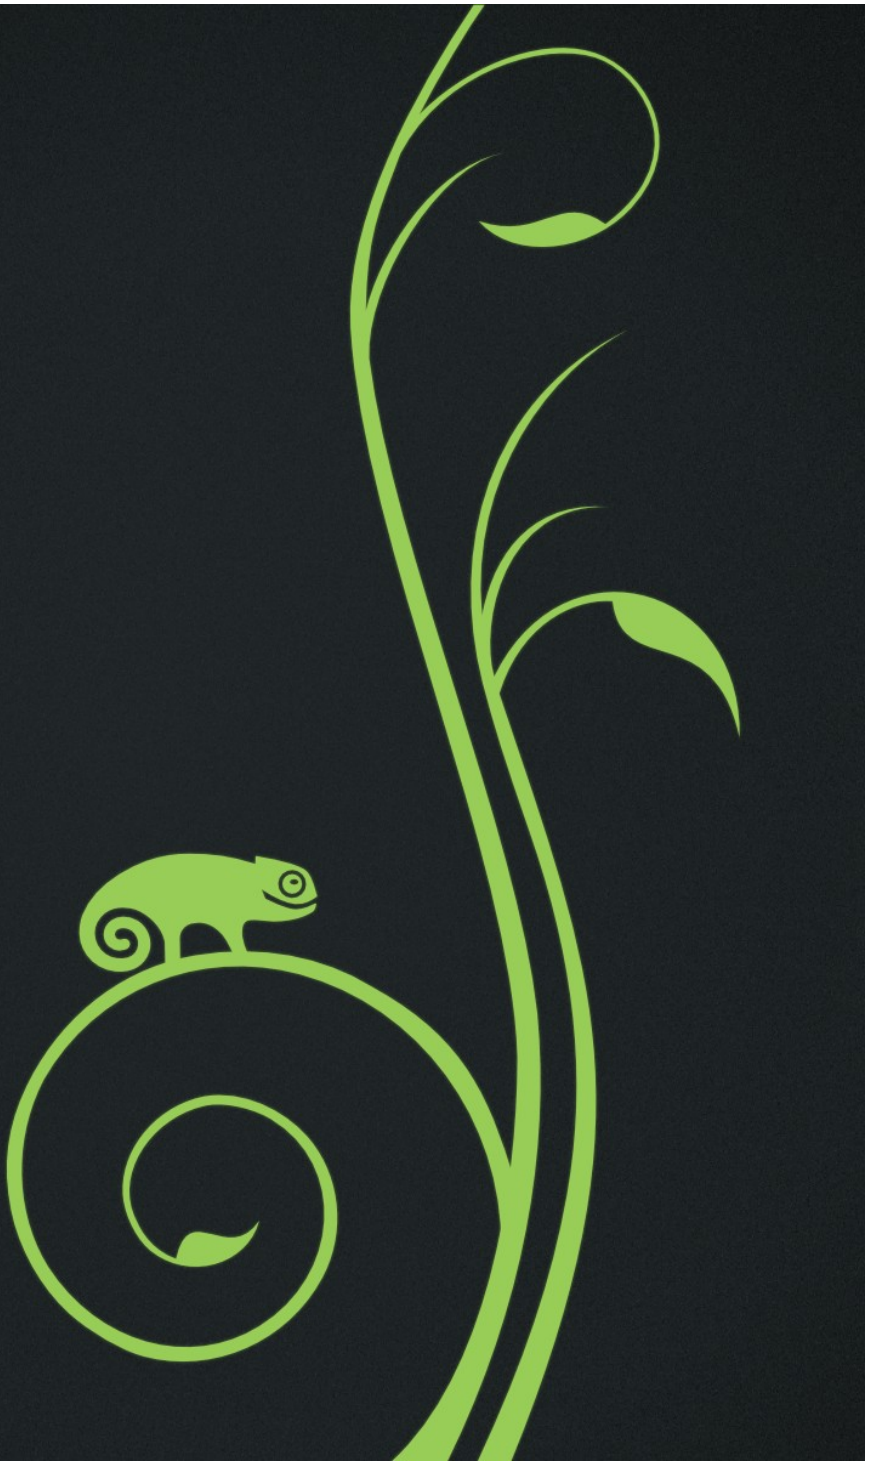
Wherewith do you teach tomorrow ?

Work together with upstream developers

Provide the best applications for servers and desktops

Support home users and their kids

What we have...



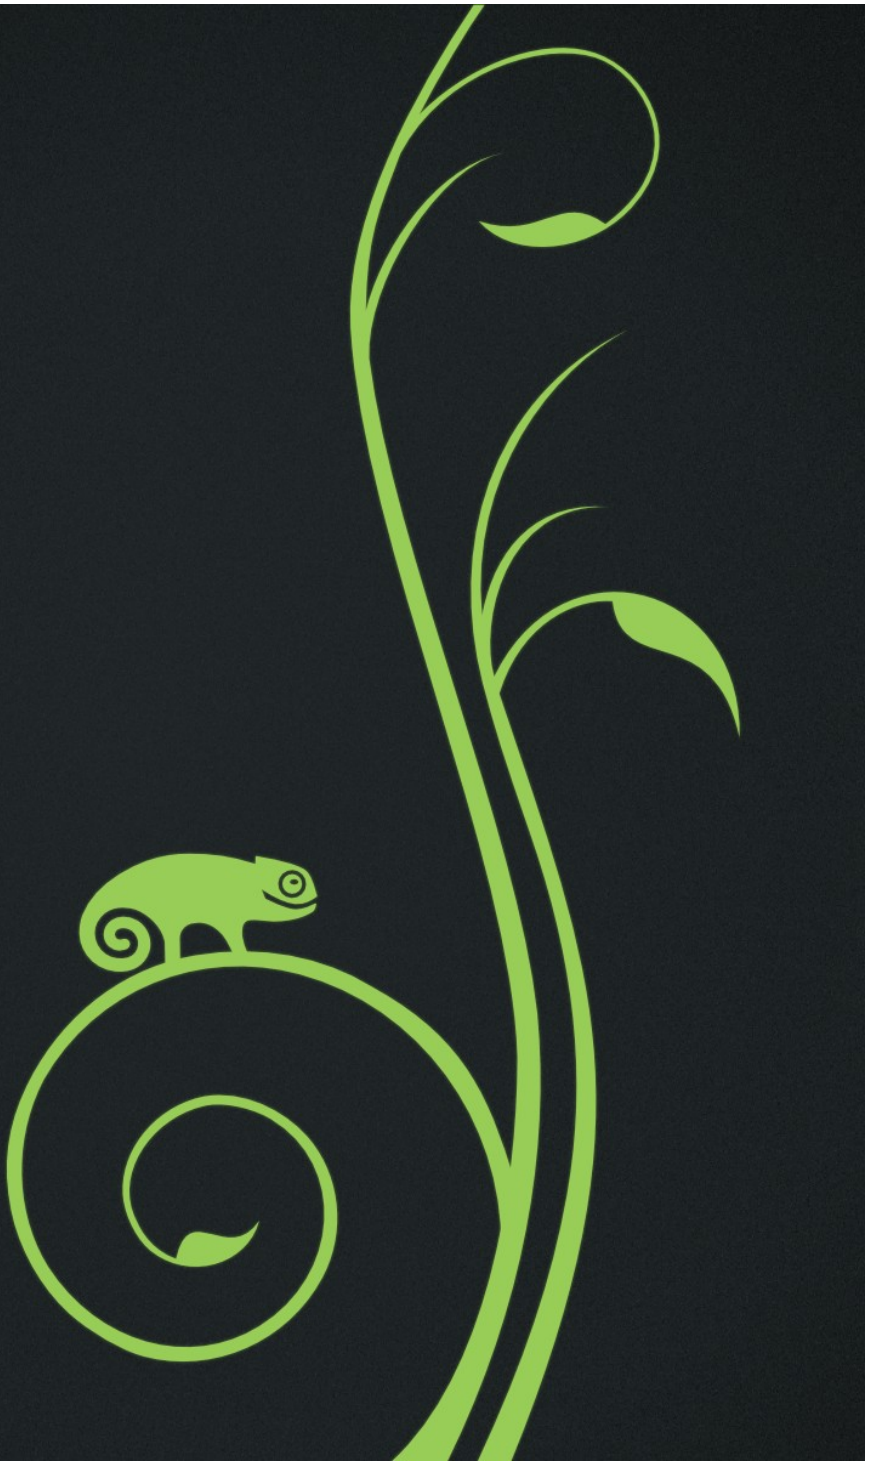
What we have

- >400 packages in the Education repository of the Open Build Service, incl. “Patterns” for easy selection of Applications
- Own domain: http://www.opensuse-education.org independent from openSUSE and SUSE (needs refresh: volunteers?)
- New domain http://www.linux-for-education.org/ waiting for new content
- Li-f-e ISO- (and USB-) images since 12.1 (current: 12.3)
- Assistance from openSUSE Community and other Companies:
  - Free openSUSE media for Schools in Germany
  - Cooperation with desktop4education and server4education
  - Cooperation with Extis GmbH (Open School Server)
  - (small cooperation with Linkat)

...and a great community!

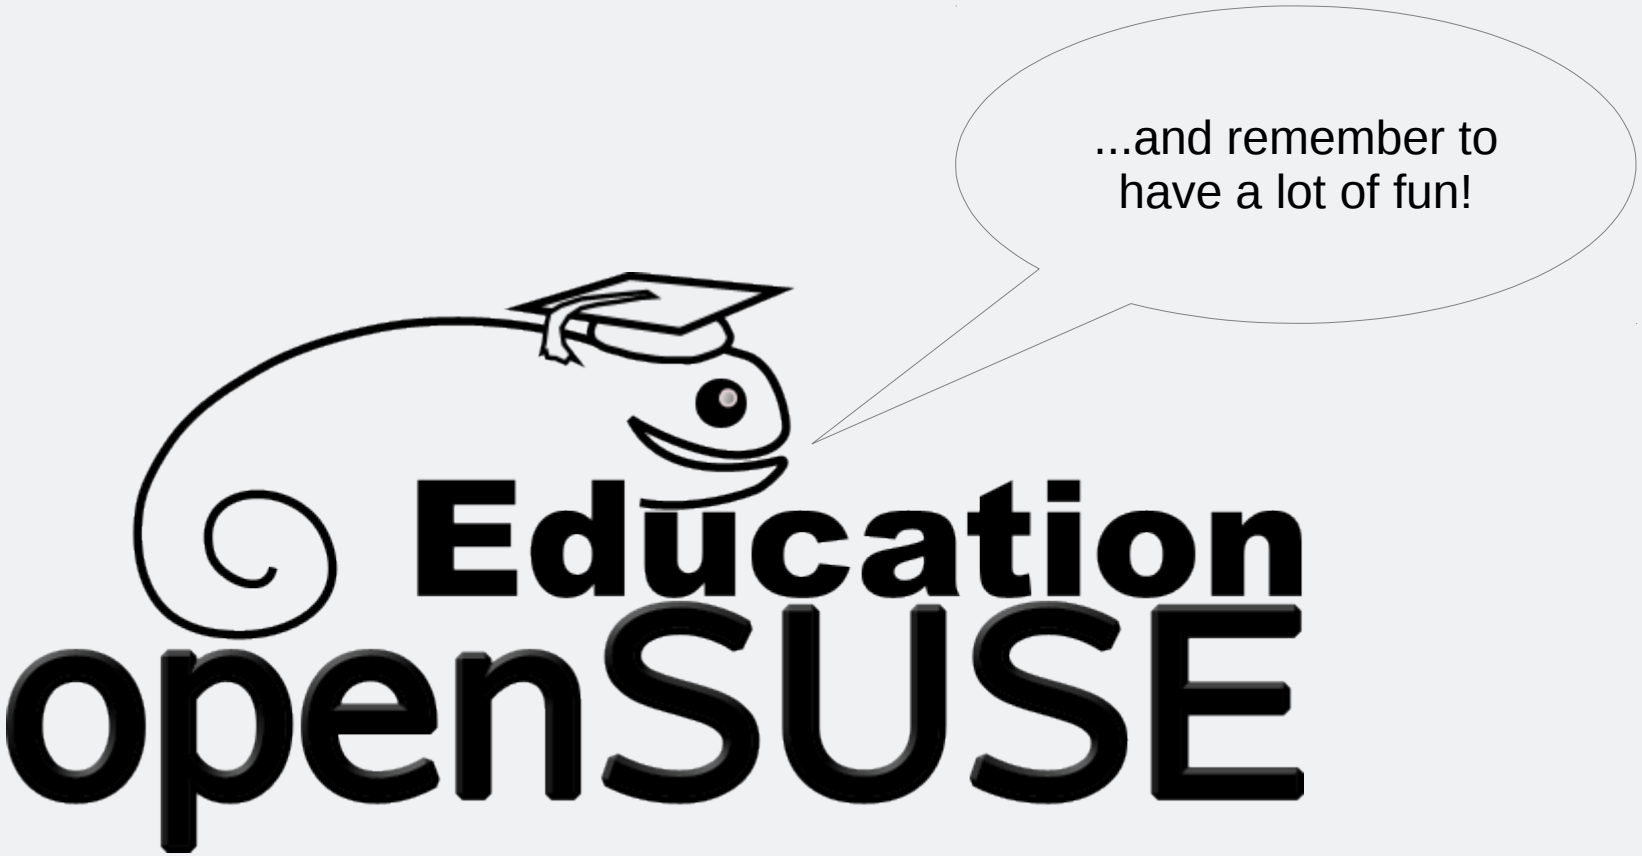
Time for Li-f-e Demo?

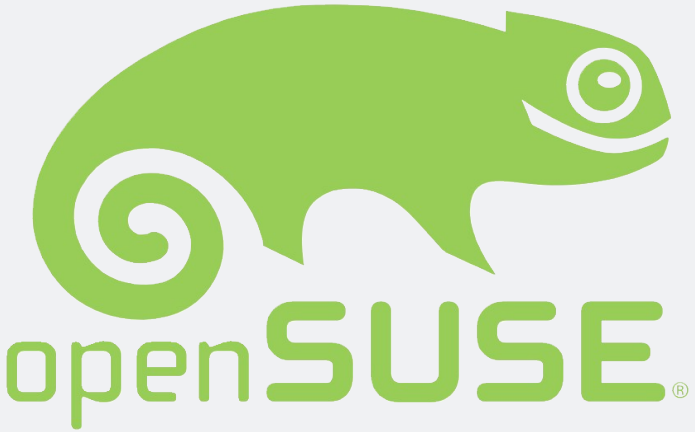
What we want



What we want

1) Show how easy it is to use Linux in Schools
2) Try to get better promotion
3) Invite others to join us





Join us on:

www.opensuse.org
